

**Basics:**

SILIKO d.o.o. is committed to product safety. For those applications identified as safety critical, product safety will always be the primary consideration during the product design life cycle, manufacture, marketing and sales of SILIKO products. SILIKO d.o.o. employees must understand and follow all applicable standards, and procedures during product development, manufacturing and marketing, for meeting all safety requirements and must report any safety related concerns in a timely manner. SILIKO d.o.o. management is responsible for addressing reported concerns and ensuring the products meet all safety related concerns. This principle applies globally to all employees, as well as suppliers and any person acting on behalf of SILIKO d.o.o..

**Purpose:**

SILIKO d.o.o. designs its products to achieve a high level of safety consistent with their application, always ensuring that we meet or exceed the relevant regulatory and industry requirements. Our processes are designed to assess potential risks and put controls in place to meet the required safety levels and reduce those safety risks so far as is reasonably practicable. These efforts help define, protect and ensure the long-term success of our company.

**Guidelines:**

- Comply with all applicable product safety requirements, agreed to customer specifications and SILIKO d.o.o.
- policies, standards and procedures.
- Always be alert and report all product safety concerns, including concerns raised by employees, customers,
- product end users and others.
- Use SILIKO's product design process to integrate product safety into the design, manufacture, marketing and
- sale of SILIKO d.o.o. products, including considerations of intended uses and foreseeable misuses.
- Assess outsourced products with the same degree of scrutiny for product safety, regulatory and potential liability attributes as those manufactured by SILIKO d.o.o. .
- Participate in training and education programs regarding product safety.
- Substantiate product claims, including marketing, sales and technical information provided to customers.
- Select and retain those suppliers, contractors, or outsourced manufacturers and service providers, that comply
- with all applicable processes pertaining to product safety and meet SILIKO d.o.o. expectations.
